Quad Chart Example – CCJO Concept Proposal

SCOPE

The CCJO describes how future joint forces are expected to operate across the ROMO in 2012-2025. It applies to operations around the globe conducted unilaterally or in conjunction with other government and non-government agencies and MN military partners. It envisions MilOps conducted within a national strategy incorporating all instruments of national power. It is applicable to COCOMs, Services, Defense agencies, and the Joint Staff for concept development and experimentation.

MILITARY PROBLEM

In the varied and highly uncertain future security environment that we expect, potential adversaries will increasingly benefit from technology diffusion and access to advanced weapon systems. Complex and adaptive adversaries will likely employ traditional, irregular, disruptive, and catastrophic methods singularly or in combinations which are intended to keep the future joint force from being successful across the range of military operations.

SAMPLE

SOLUTION/CENTRAL IDEA

The CCJO solution offers five interrelated elements that describe how the joint force is expected to resolve the military problem:

- A Central Idea
- A Systems View of the Environment where all situations (adversary and crisis response) are viewed as involving complex adaptive systems
- The Fundamental Joint Actions that are key to designing joint force operations
- The Supporting Ideas which describe how the future joint force is expected to operate
- The Key Characteristics the joint force

OPR and JUSTIFICATION

OPR: Joint Staff J7 JETCD

OPR – CBA (JICs): NA

JUSTIFICATION:

- National Defense Strategy (NDS)
- National Military Strategy
- Transformation Planning Guidance
- National Security Strategy
- Strategic Planning Guidance
